We are so pleased for the opportunity to offer such a sought after presenter! Dr. Temple Grandin is a world renowned expert on animal behavior. She is an extraordinary woman whose triumph over her developmental disorder is profound but who still feels completely alienated from human emotion & interaction. With people, she said, she is a self proclaimed "anthropologist on Mars," but among animals she is completely at home.

Besides being autistic, Temple Grandin earned her Ph.D. in animal science from the University of Illinois; went on to become an associate professor at Colorado State University; and wrote two books on autism, including the seminal Thinking in Pictures. When Dustin Hoffman went to research his role in Rain Man, Temple was the person he contacted.

One of the most celebrated and effective animal advocates on the planet, Grandin revolutionized animal movement systems and spearheaded reform of the quality of life of many animals.

She has authored over 300 articles on animal behavior. Her books "Animals in Translation" and "Animals Make Us Human" were both on the New York Times best seller list as well as on the Canadian best seller list. She has authored nine books, been featured on prime time television shows such as 20/20 & Larry King Live as well as been featured in numerous magazines. Dr. Grandin's ability to read the animals' point of view is awe inspiring.

Come join us for a thought-provoking and insightful seminar!
